Yes, they were completed. Here are the docs I sent to the WoodHeaterReports email address.

Mr. Warner,

Our records show that the retests for the HP21 and HP61 models were scheduled for the week of August 30. Did the certification tests occur? If so, the Wood Heater Rule requires that performance data be submitted to the EPA within 60 days after completing a certification test. Please advise.

Ok, thanks for the email.

I will re-submit them separately.

Bryan,

Thank you for the 30 days Notice. Are the HP21 and HP61 the same model line? If not, you are required to submit separate Notices.

Subject: HP21-HP61 Retest

Rafael,

Please find attached our 30 day notice for retesting model(s) HP21 and HP61 pellet stoves for recertification purposes. The testing dates are August 30-September 4th. The units from the prior test 5 years ago are being shipped to Intertek test lab and will be the responsible party to open the seal. We also need to know if we will still need to do the 48 hour conditioning burn on the 2 units as those were done previously. Thank you.
